**PEBBLE CREEK EXECUTES DRILLING CONTRACT FOR ASKOT, INDIA;  
LISTS IN FRANKFURT**

Pebble Creek Mining Ltd. is pleased to announce that its Indian subsidiary, Adi Gold Mining Pvt. Ltd., has executed a 10,000-metre drilling contract with Mitchell Drilling India Private Ltd. Mitchell is a subsidiary of a company based in Brisbane, Australia, and has been established in India for several years. The drill is scheduled to arrive at the Askot copper and zinc property before the end of May.

This resolves a problem common during this time of intense mineral exploration and development – an acute shortage of skilled people and services.

The Company will drill three classes of holes: twins of some of the 51 holes drilled by the United Nations and Indian government agencies 20 to 40 years ago; step-out holes along strike and at depth; and conductive anomalies found by the Company's horizontal loop electromagnetic ("HLEM") survey in late 2006.

The confirmation holes are aimed at establishing a National Instrument 43-101 compliant mineral resource if they correlate well with the body of previous drilling results.

The step-out holes will explore untested extensions of the known steeply dipping massive sulfide deposit. Previous workers had equipment unable to explore below 180 metres, nor the northwest extension under extreme topography. Mitchell's equipment is capable of HQ size to more than 700 metres and NQ core size to more than 1,000 metres.

Five HLEM anomalies, each a few hundred metres in length, occur in the same series of sulfide-bearing schist beds for a total distance of 3,000 metres along strike northwest and southeast of the 550-metres bed of known mineralization.

Askot is located in the low foothills of the Himalayas, in Uttarakhand state (formerly Uttaranchal), India. The principal metals in the Askot deposit are copper and zinc, with some silver, lead and gold.

Pebble Creek has worked in India for 12 years and has 100 percent interests in Askot and two other properties. The Company also has applications in process to acquire 14 others.

In a news release of April 26, the Company announced its listing on the Berlin-Bremen Stock Exchange of the Deutsche Boerse. Inadvertently omitted was that the Company was previously and continues to be listed on the Deutsche Boerse's Frankfurt Stock Exchange under the same symbol, "HBH", under the sponsorship of RG Securities AG, Frankfurt am Main, Germany.

**Forward-Looking Statements.** *This news release contains forward-looking statements, which address future events and conditions, which are subject to various risks and uncertainties. The Company's actual results, programs and financial position could differ materially from those anticipated in such forward-looking statements as a result of numerous factors, some of which may be beyond the Company's control. These factors include: the availability of funds; the timing and content of work programs; results of exploration activities and development of mineral properties; the interpretation of drilling results and other geological data, the uncertainties of resource and reserve estimations, receipt and security of mineral property titles; project cost overruns or unanticipated costs and expenses, fluctuations in metal prices; currency fluctuations; and general market and industry conditions.*

*Forward-looking statements are based on the expectations and opinions of the Company's management on the date the statements are made. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such undue reliance should not be placed on forward-looking statements.*

*“The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this release.”*
