### **PEBBLE CREEK ENGAGES SRK CONSULTING TO PREPARE RESOURCE ESTIMATE**

TSX-V: PEB

FOR IMMEDIATE RELEASE

Vancouver, British Columbia, and New Delhi, India – May 14, 2008 – Pebble Creek Mining Ltd. (“Pebble Creek” or the “Company”) is pleased to announce the engagement of SRK Consulting (“SRK”) to review recent and historic drill hole and underground data for the purposes of preparing an NI 43-101 compliant mineral resource estimate on the Company’s Askot property, Uttarakhand, India.

A total of 51 core drill holes were drilled by other parties during the period 1965-1988 for an aggregate of almost 9,000 metres. Core drill holes by Pebble Creek in 2006 and 2007 numbered 17 and totalled 4,642 metres. A drift installed by previous parties in the 1980s exposed approximately 300 metres of high-grade copper and zinc mineralization. In addition to drilling, the Company has re-mapped the geology and conducted extensive geophysical and geochemical surveys.

The work will be directed by SRK’s Toronto office and SRK’s office in Kolkata, India, will be the local liaison and provide the project manager and a geologist who is knowledgeable on the Askot deposit.

About Pebble Creek: The Company has been active in India since it became accessible to foreign and private-sector mining in 1994. It is conducting advanced exploration of its Askot property. Its mining lease application on Askot has been approved by the Indian Ministry of Mines. Askot is a massive sulphide deposit of copper, zinc and lead, also containing accessory silver and gold.

On behalf of the Board,  
Andrew E. Nevin, Ph.D., P.Eng.  
President and Chief Executive Officer
