CHANGE OF ADDRESS AND COST CUTTING MEASURES

TSX-V: PEB

FOR IMMEDIATE RELEASE

Vancouver, British Columbia, and New Delhi, India – May 19, 2009 – Pebble Creek Mining Ltd. (the “Company” or “Pebble Creek”) has relocated its Vancouver office, effective immediately, to:

Pebble Creek Mining Ltd.
1 – 2910 Commercial Drive
Vancouver, B.C. V5N 4C9

Telephone number remains the same: 604 696 6101, and fax 604 696 6196.

Because all of the Company’s activities are in India and much of its recent financing is from international investors, it has little need for an office in Vancouver’s financial district. The new office is small and located in an east Vancouver neighbourhood. The savings in rent and related costs will be substantial. Other economizing measures in Canada have cut overheads significantly during this period of financial uncertainty. The three full-time officers of the Company have foregone salaries for many months and one employee took voluntary retirement in March.

In India the Company terminated a lease on one of its facilities and relocated to a less expensive building. The Company has curtailed travel; temporarily laid off 15 workers; and reduced its tunnel driving crew to one shift per day.

The Company is determined to weather the storm and still targets late 2011 for commercial production of the Askot massive sulfide prospect in Uttarakhand, India.

India, the largest democracy in the world, re-elected the Congress Party’s coalition last week with a stronger mandate for reform. This is good news for the mining community. One pending reform will be passage of the much discussed National Mining Policy. The policy makes several structural changes that will benefit mineral exploration, development and mining, especially cutting bureaucratic red tape and providing for secure transition from Prospecting Licences to Mining Leases.

About Pebble Creek. The Company is concentrating on developing the high-grade Askot copper, zinc and lead deposit, with some gold, silver and indium, in Uttarakhand State, India. Askot is projected to be an environmentally friendly underground mine. With a thorough knowledge of India after 14 years in country, the Company is well positioned to carry out this project and others in the acquisition pipeline.

This news release contains forward-looking statements, which address future events and conditions, which are subject to various risks and uncertainties. The Company's actual results, programs and financial position could differ materially from those anticipated in such forward-looking statements as a result of numerous factors, some of which may be beyond the Company's control. These factors include: the availability of funds; the timing and content of work programs; results of exploration activities and development of mineral properties, the interpretation of drilling results and other geological data, the uncertainties of resource and reserve estimations, receipt and security of mineral property titles; project cost overruns or unanticipated costs and expenses, fluctuations in commodity prices; currency fluctuations; and general market and industry conditions.

Forward-looking statements are based on the expectations and opinions of the Company's management on the date the statements are made. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
