ERNST & YOUNG PVT. LTD. ENGAGED FOR \$10 MILLION FINANCING

TSX-V: PEB

FOR IMMEDIATE RELEASE

Vancouver, British Columbia – November 13, 2007 – Pebble Creek Mining Ltd. (the “Company”) announces the following:

On November 7 the Company and its wholly-owned Indian subsidiary, Adi Gold Mining Pvt. Ltd. (“Adi”), engaged Ernst & Young Pvt. Ltd. to advise and assist in assembling up to \$10 million for its Askot project. The engagement will be for a placement of a minority interest in Adi with institutional investors based in India. The Company expects the placement to be at a premium to the current market capitalization of Pebble Creek.

Funds will be used for additional drilling and a feasibility study on Adi’s wholly-owned Askot copper and zinc property. The placement will be subject to a shareholders’ agreement entitling Adi shareholders to subscribe to further assessments in order to maintain their relative interests. Adi will transfer its other mineral assets to a new wholly-owned subsidiary of the Company.

The foregoing is subject to the approval of the TSX Venture Exchange.

Pebble Creek is an exploration company focused on India and has twelve years experience in the country. Askot is a volcanogenic massive sulphide deposit of copper, zinc, silver, gold and lead located in Uttarakhand, India. In September the Government of India’s Ministry of Mines approved Adi’s application for a Mining Lease at Askot. The Company believes this is one of the first to be issued to a foreign-owned company in the base and precious metals sector. Drilling is continuing at Askot. The Company will continue to release assay results as a meaningful picture develops.

On Behalf of the Board
Andrew E. Nevin, P.Eng.
President and CEO

***Forward-Looking Statements.** This news release contains forward-looking statements, which address future events and conditions, which are subject to various risks and uncertainties. The Company's actual results, programs and financial position could differ materially from those anticipated in such forward-looking statements as a result of numerous factors, some of which may be beyond the Company's control. These factors include: the availability of funds; the timing and*

content of work programs; results of exploration activities and development of mineral properties; the interpretation of drilling results and other geological data, the uncertainties of resource and reserve estimations, receipt and security of mineral property titles; project cost overruns or unanticipated costs and expenses, fluctuations in metal prices; currency fluctuations; and general market and industry conditions.

Forward-looking statements are based on the expectations and opinions of the Company's management on the date the statements are made. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such undue reliance should not be placed on forward-looking statements.

“The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this release.”
